Content of the “ManuScan Individual Biometrics Training” workshop

Duration: 1 day

Individual project-specific training based on the knowledge acquired by participants over the course of Level-1 training.

The focus is placed individually on the requirements of the first common project to be implemented and is specifically aimed at the project.

- Overview and formulation of project-specific requirements
- Project system setup and system design
- Collaborative compilation or clarification of project parameters
- Possibilities for adjusting parameters during facility operation
- Teaching and expanding the participants' system analysis and troubleshooting skills
- Documentation

Prerequisites for participation:

- Prerequisites for participation:
 - Participation in at least Level-1 training
 - Preferred - participation in Level-2 training

Maximum number of participants: 4
