Content of the “ManuScan Biometrics Training Level 2” workshop

Duration: 2 days

Follow-up training based on the knowledge acquired by the participants at Level-1.

The training programme includes expanding the participants' knowledge of the functions of the iCOGNIZE ManuScan Biometrics System. A special focus is put on the following topics:

- Overview of the latest innovations introduced in the system by the manufacturer since Level-1 training
- Overview and formulation of project-specific requirements
- Project system configuration and system design based on completed projects
- Collaborative creation of one or several example project parametrisations
- Possibilities for adjusting parameters during facility operation
- Instruction

Prerequisites for participation:

- Participation in at least Level-1 training

Maximum number of participants: 4
